

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/atm-21-730	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The data that PQQ reduces LPS-induced apoptosis of HAPI microglia with the increase of autophagy level, and changed the position of LAMP2 in cells to enhance lysosomal activity will be shared, which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	-
7	To whom will you share the data?	Immunologists who are interested in the studies of inflammation.
8	For what type of analysis or purpose?	For analysis to evaluate the effect of PQQ in HAPI microglia cells exposed to LPS.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: ymz@ntu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
