

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/atm-21-1951	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The data of PQQ's effects on inflammation and apoptosis in astrocytes will be shared, which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Researchers who are interested in the nerve regeneration of PQQ.
8	For what type of analysis or purpose?	To investigate the effect of PQQ on inflammatory apoptosis and autophagy in rat spinal cord injury and LPS-induced astrocyte inflammation and apoptosis model.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: 18761896519@163.com , ymz@ntu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
