

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/atm-21-3142	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The SWE data, serum markers and the outcomes.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	The protocol has been published in the Chinese clinical trial registry (https://www.chictr.org.cn/showproj.aspx?proj=10445).
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	To those researchers who were major in chronic hepatitis B and SWE measurements with previously published relevant SCI paper.
8	For what type of analysis or purpose?	For multicenter cooperation study to validate the accuracy of SWE.
9	How or where can the data/documents be obtained?	The data relevant to this study are available from the corresponding author on reasonable request via email: zhongbh@mail.sysu.edu.cn .
10	Any other restrictions?	All published results utilized our data should list our research team as the co-authors after all the authors' approvals. We may balance the potential benefits and risks for each request and then provide the data that could be shared.
