<u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier		None
name, catalogue number and RRID, if available.		
Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain.	····· (None
Provide accession number in repository OR		
supplier name, catalog number, clone number, OR RRID		
Primary cultures: Provide species, strain, sex of		None
origin, genetic modification status.		
Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age,		None
genetic modification status. Provide accession		
number in repository OR supplier name, catalog		
number, clone number, OR RRID		
Animal observed in or captured from the		None
field: Provide species, sex and age where		
possible		
Model organisms: Provide Accession number		None
in repository (where relevant) OR RRID		
Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession		None
number if available, and source (including location		
for collected wild specimens)		
Microbes: provide species and strain, unique		None
accession number if available, and source		Home
Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or		None
equivalent committee(s), provide reference number		
for approval.		
Provide statement confirming informed consent		None
obtained from study participants.		
Report on age and sex for all study participants.		None

<u>Design</u>

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration		None
number OR cite DOI in manuscript.		
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-		None
by-step protocols are available.		
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been	Material and Methods	11/ 4
done, or if they were not carried out.		
Sample size determination	Material and Methods: 2.1 Microarray data sources	
	and processing/ paragraph 4	
Randomisation		None
Blinding		None
Inclusion/exclusion criteria	Material and Methods: 2.2 DEGs identification and	None
	WGCNA/ paragraph 5	
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was		None
replicated in laboratory		
Define whether data describe technical or biological		None
replicates		
Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of		None
authority granting ethics approval (IRB or equivalent		
committee(s), provide reference number for		
approval.		
		None
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or		None
approval. Studies involving experimental animals: State details		None
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		None
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number		None
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of		
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if		
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of		
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Yes (indicate where provided: section/paragraph)	None
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why. Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	None n/a
approval. Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval. Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Yes (indicate where provided: section/paragraph)	None

<u>Analysis</u>

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is	Results: 3.3 Identification of hub genes and	
excluded, and whether the criteria for exclusion were	diagnostic efficacy verification/ paragraph 12	
determined and specified in advance.		
Statistics		
	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of	Material and Methods: 2.6 Statistical analysis/	
tests.	paragraph 9	
Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available,		None
including protocols for access or restriction on		
access.		
If data are publicly available, provide accession	Material and Methods: 2.1 Microarray data sources	
number in repository or DOI or URL.	and processing/ paragraph 4	
If publicly available data are reused, provide	Material and Methods: 2.1 Microarray data sources	
accession number in repository or DOI or URL, where	and processing/ paragraph 4	
possible.		
Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential		None
for replicating the main findings of the study:		
State whether the code or software is available.		None
If code is publicly available, provide accession		None
number in repository, or DOI or URL.		

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of		None
discipline-specific guidelines, established and		
endorsed through community initiatives. Journals		
have their own policy about requiring specific		
guidelines and recommendations to complement		
MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI,	ICMJE guidelines were followed, as the journal	
ARRIVE) have been followed, and whether a checklist	follows ICMJE recommendations for publication.	
(eg., CONSORT, PRISMA, ARRIVE) is provided with		
the manuscript.
