

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/atm-21-5449	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	For original data of NGS test is not applicable. For Genomic data and survival data of public immunotherapy cohorts is applicable.
2	If not, would you like to share the reason for your decision?	For original data of NGS test, the NGS test was performed in 3D Medicines Inc. Because sequencing data contains sequencing algorithm and other core trade information, it is not convenient to provide.
3	What data in particular will be shared?	Genomic data and survival data of public immunotherapy cohorts that had been analyzed in current study.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan will also be shared if request.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date.
7	To whom will you share the data?	Medical oncologists or surgeons who interested in DDR variation.
8	For what type of analysis or purpose?	For analysis to explore the predictive effect of DDR variation on immunotherapy.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: yanglibme@cqu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
