Materials Design Analysis Reporting (MDAR) Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier name, catalogue number and RRID, if available.	Yes (Page4-7, Methods)	

Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain. Provide accession number in repository **OR** supplier name, catalog number, clone number, **OR** RRID	Yes (Page4, Methods, paragraph 3)	
Primary cultures: Provide species, strain, sex of origin, genetic modification status.	Yes (Page4, Methods, paragraph 3)	

Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository **OR** supplier name, catalog number, clone number, **OR** RRID	Not applicable. (No animal experiments are conducted in this study.)	
Animal observed in or captured from the field: Provide species, sex and age where possible	Not applicable. (No animal experiments are conducted in this study.)	
Model organisms: Provide Accession number in repository (where relevant) **OR** RRID	Not applicable. (No animal experiments are conducted in this study.)	

Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)	Not applicable. (No plants or microbes are conducted in this study.)	
Microbes: provide species and strain, unique accession number if available, and source	Not applicable. (No plants or microbes are conducted in this study.)	

Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Page7, paragraph 2, #Methods, ##OS tissue collection	
Provide statement confirming informed consent obtained from study participants.	Page7, paragraph 2, #Methods, ##OS tissue collection	
Report on age and sex for all study participants.	Not applicable.	

Design

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration number **OR** cite DOI in manuscript.	Page7, paragraph 2, #Methods, ##OS tissue collection	

Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-by-step protocols are available.	Not applicable.	

Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been done**, or** if they were not carried out.	Not applicable. This study only collects tumor tissue samples and detects gene expression in the samples.	
Sample size determination	Not applicable.	
Randomisation	Not applicable.	
Blinding	Not applicable.	
Inclusion/exclusion criteria	Page7, paragraph 2, #Methods, ##OS tissue collection	

Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was replicated in laboratory	#Methods, ##Statistical analysis, Page 7, paragraph 3	
Define whether data describe technical or biological replicates	#Methods, ##Statistical analysis, Page 7, paragraph 3	

Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Not applicable.	
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Not applicable.	
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Page7, paragraph 2, #Methods, ##OS tissue collection This study was approved by the Ethics Committee of Affiliated Hospital of Guizhou Medical University. (GZYD003-201753035)	

Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	n/a
If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval	Not applicable.	

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.	Not applicable.	

Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of tests.	#Methods, ##Statistical analysis, Page 7, paragraph 3	

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.	The datasets analyzed during the current study are available from the corresponding author on reasonable request.	
If data are publicly available, provide accession number in repository or DOI or URL.	Not applicable.	
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.	Not applicable.	

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential for replicating the main findings of the study:	Not applicable.	
State whether the code or software is available.	Not applicable.	
If code is publicly available, provide accession number in repository, or DOI or URL.	Not applicable.	

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication.
