

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/atm-21-6975	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The tumor data in particular will be shared, and we also found that the impairment of liver function will not significantly affect the optimal TBR, but will prolong the time window of optimal TBR and bring a wider and more stable operation time window for the surgeon, which has guiding clinical practice and is rarely provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol and statistical analysis plan will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Five years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	All oncologists or scholars who are interested in cancer research.
8	For what type of analysis or purpose?	For analysis to optimize this procedure and set more dose groupings such as more groupings: high, medium, and low doses.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: mf1934045@smail.nju.edu.cn.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
