STREGA Reporting Recommendations, Extended from STROBE Statement

| Item | Item No | Description | Reported on Page Number/Line Number | Reported on Section/Paragraph |
| :---: | :---: | :---: | :---: | :---: |
| Title and Abstract | 1 | (a) Indicate the study's design with a commonly used term in the title or the abstract. | Page 1 , line 3. | Title |
|  |  | (b) Provide in the abstract an informative and balanced summary of what was done and what was found. | Page 1-2, line 30-56. | Abstract/Paragraph 1-4. |
| Introduction |  |  |  |  |
| Background rationale | 2 | Explain the scientific background and rationale for the investigation being reported. | Page 2-4, line 62-104. | Introduction/Paragraph 1-3. |
| Objectives | 3 | State specific objectives, including any pre-specified hypotheses. <br> (State if the study is the first report of a genetic association, a replication effort, or both.) | Page 4, line 92-104. | Introduction/Paragraph 3. |
| Methods |  |  |  |  |
| Study design | 4 | Present key elements of study design early in the paper. | Page 4, line 91-104. | Introduction/Paragraph 3 |
| Setting | 5 | Describe the setting, locations and relevant dates, including periods of recruitment, exposure, follow-up, and data collection. | Page 4, line 106-112 | Methods/Paragraph 1. |
| Participants | 6 | (a) Cohort study - Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up. <br> Case-control study - Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls. <br> Cross-sectional study - Give the eligibility criteria, and the sources and methods of selection of participants. (Give information on the criteria and methods for selection of subsets of participants from a larger study, when relevant.) | NA | NA |
|  |  | (b) Cohort study - For matched studies, give matching criteria and number of exposed and unexposed. Case-control study - For matched studies, give matching criteria and the number of controls per case. | Page 4, line 106-112. | Methods/Paragraph 1. |
| Variables | 7 | (a) Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable. <br> (b) Clearly define genetic exposures (genetic variants) using a widely-used nomenclature system. Identify variables likely to be associated with population stratification (confounding by ethnic origin). | Page 4-5, line 114-147. | Methods/Paragraph 2-6. |

| Data sources/ measurement | $8^{*}$ | (a) For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group. <br> (b) Describe laboratory methods, including source and storage of DNA, genotyping methods and platforms (including the allele calling algorithm used, and its version), error rates and call rates. State the laboratory/centre where genotyping was done. Describe comparability of laboratory methods if there is more than one group. Specify whether genotypes were assigned using all of the data from the study simultaneously or in smaller batches. | Page 4-5, line 114-147. | Methods/Paragraph 2-6. |
| :---: | :---: | :---: | :---: | :---: |
| Bias | 9 | (a) Describe any efforts to address potential sources of bias. <br> (b) or quantitative outcome variables, specify if any investigation of potential bias resulting from pharmacotherapy was undertaken. If relevant, describe the nature and magnitude of the potential bias, and explain what approach was used to deal with this. | Page 4-5, line 114-147. | Methods/Paragraph 2-6. |
| Study size | 10 | Explain how the study size was arrived at. | Page 4, line 106-112. | Methods/Paragraph 1. |
| Quantitative variables | 11 | Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen, and why. <br> (If applicable, describe how effects of treatment were dealt with.) | NA | NA |
| Statistical methods | 12 | (a) Describe all statistical methods, including those used to control for confounding. [State software version used and options (or settings) chosen.] | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (b) Describe any methods used to examine subgroups and interactions. | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (c) Explain how missing data were addressed. | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (d) Cohort study - If applicable, explain how loss to follow-up was addressed. Case-control study - If applicable, explain how matching of cases and controls was addressed. Cross-sectional study - If applicable, describe analytical methods taking account of sampling strategy. | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (e) Describe any sensitivity analyses. | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (f) State whether Hardy-Weinberg equilibrium was considered and, if so, how. | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (g) Describe any methods used for inferring genotypes or haplotypes. | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (h) Describe any methods used to assess or address population stratification. | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (i) Describe any methods used to address multiple comparisons or to control risk of false positive findings. | Page 5, line 143-147 | Methods/Paragraph 6. |
|  |  | (j) Describe any methods used to address and correct for relatedness among subjects | Page 5, line 143-147 | Methods/Paragraph 6. |

| Results |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Participants | 13* | (a) Report the numbers of individuals at each stage of the study - e.g., numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed. <br> (Report numbers of individuals in whom genotyping was attempted and numbers of individuals in whom genotyping was successful). | Page 5, line 149-154. | Results/Paragraph 1. |
|  |  | (b) Give reasons for non-participation at each stage. | Page 5, line 149-154. | Results/Paragraph 1. |
|  |  | (c) Consider use of a flow diagram. | Page 5, line 149-154. | Results/Paragraph 1. |
| Descriptive data | 14* | (a) Give characteristics of study participants (e.g., demographic, clinical, social) and information on exposures and potential confounders. <br> (Consider giving information by genotype.) | Page 5-7, line 149-200. | Results/Paragraph 1-7. |
|  |  | (b) Indicate the number of participants with missing data for each variable of interest. | Page 5-7, line 149-200. | Results/Paragraph 1-7. |
|  |  | (c) Cohort study - Summarize follow-up time (e.g., average and total amount). | Page 5-7, line 149-200. | Results/Paragraph 1-7. |
| Outcome data | 15* | Cohort study - Report numbers of outcome events or summary measures over time. [Report outcomes (phenotypes) for each genotype category over time] | Page 5-7, line 149-200. | Results/Paragraph 1-7. |
|  |  | Case-control study - Report numbers in each exposure category, or summary measures of exposure. (Report numbers in each genotype category) | NA | NA |
|  |  | Cross-sectional study - Report numbers of outcome events or summary measures. <br> [Report outcomes (phenotypes) for each genotype category] | NA | NA |
| Main results | 16 | (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (e.g., 95\% confidence intervals). Make clear which confounders were adjusted for and why they were included. | Page 5-7, line 149-200. | Results/Paragraph 1-7. |
|  |  | (b) Report category boundaries when continuous variables were categorized. | Page 5-7, line 149-200. | Results/Paragraph 1-7. |
|  |  | (c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period. | Page 5-7, line 149-200. | Results/Paragraph 1-7. |
|  |  | (d) Report results of any adjustments for multiple comparisons. | Page 5-7, line 149-200. | Results/Paragraph 1-7. |
| Other analyses | 17 | (a) Report other analyses done - e.g., analyses of subgroups and interactions, and sensitivity analyses. | NA | NA |
|  |  | (b) If numerous genetic exposures (genetic variants) were examined, summarize results from all analyses undertaken. | NA | NA |
|  |  | (c) If detailed results are available elsewhere, state how they can be accessed. | NA | NA |
| Discussion |  |  |  |  |
| Key results | 18 | Summarize key results with reference to study objectives. | Page 7, line 202-216. | Discussion/Paragraph 1. |

| Limitations | 19 | Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias. | Page 7, line 202-216. | Discussion/Paragraph 1. |
| :---: | :---: | :---: | :---: | :---: |
| Interpretation | 20 | Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence. | Page 7-8, line 202-257. | Discussion/Paragraph 1-4. |
| Generalizability | 21 | Discuss the generalizability (external validity) of the study results. | Page 7, line 202-216. | Discussion/Paragraph 1. |
| Other Information |  |  |  |  |
| Funding | 22 | Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based. | NA | NA |

From: Little J, Higgins JPT, loannidis JPA, Moher D, Gagnon F, et al. (2009) STrengthening the REporting of Genetic Association Studies (STREGA) - An extension of the STROBE Statement. PLoS Med 6(2): e1000022. doi:10.1371/journal.pmed. 1000022

* Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.
