

## Data Sharing Statement

<b>Article Info</b>	<a href="https://dx.doi.org/10.21037/atm-22-1341">https://dx.doi.org/10.21037/atm-22-1341</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others??	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Baseline characteristics of the include patients and anti-tuberculosis drug plasma concentration measurements.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and clinical study report will also be shared if requested. The informed consent was not applicable because the ethics committee waived it due to the retrospective nature of the study.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Clinical laboratory physicians or internal medicine physicians who specialize in anti-TB treatment.
8	For what type of analysis or purpose?	For analysis to evaluate the factors influencing the anti-tuberculosis drug plasma concentration.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: xxabc2012@163.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
