Item	**Question**	**Authors' Response** **(place "-" if not applicable)**
1	Would you like to share data collected for your study to others?	Yes but with restrictions.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Limited number of anonymized images from two main datasets containing curated images of vitiligo lesions from Chinese patients (Fitzpatrick skin types III or IV) may be shared.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol and statistical analysis plan may also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Researchers interested in the study of deep learning for vitiligo research.
8	For what type of analysis or purpose?	To study or compare artificial intelligence models for the detection and assessment of vitiligo.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: geyp@pumcderm.cams.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
