<u>M</u>aterials <u>D</u>esign <u>A</u>nalysis <u>R</u>eporting (MDAR)
Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier name, catalogue number and RRID, if available.	#Methods/paragraph 2, ##Instruments and reagents	

Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain. Provide accession number in repository **OR** supplier name, catalog number, clone number, **OR** RRID	The information of **Cell lines** is not involved in this paper.	n/a
Primary cultures: Provide species, strain, sex of origin, genetic modification status.	The information of **Primary cultures** is not involved in this paper.	n/a

Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository **OR** supplier name, catalog number, clone number, **OR** RRID	The information of **Laboratory animals** is not involved in this paper.	n/a
Animal observed in or captured from the field: Provide species, sex and age where possible	The information of **Laboratory animals** is not involved in this paper.	n/a
Model organisms: Provide Accession number in repository (where relevant) **OR** RRID	The information of **Laboratory animals** is not involved in this paper.	n/a

Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)	The information of **Plants** is not involved in this paper.	n/a
Microbes: provide species and strain, unique accession number if available, and source	The information of **Microbes** is not involved in this paper.	n/a

Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Footnote/paragraph 3	
Provide statement confirming informed consent obtained from study participants.	Footnote/paragraph 3	
Report on age and sex for all study participants.	Footnote/paragraph 3	

Design

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration number **OR** cite DOI in manuscript.	Non-clinical trial, not involved.	n/a

Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-by-step protocols are available.	Not involved in this paper.	n/a

Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been done**, or** if they were not carried out.		
Sample size determination	It was not carried out.	n/a
Randomisation	It was not carried out.	n/a
Blinding	It was not carried out.	n/a
Inclusion/exclusion criteria	#Methods/paragraph 1, ##Samples	

Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was replicated in laboratory	#Methods/paragraph 3, ###Precision #Methods/paragraph 4, ###Accuracy #Methods/paragraph 5, ###Linearity #Methods/paragraph 6, ###Limit of detection	
Define whether data describe technical or biological replicates	#Methods/paragraph 3, ###Precision #Methods/paragraph 4, ###Accuracy #Methods/paragraph 5, ###Linearity #Methods/paragraph 6, ###Limit of detection	

Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Footnote/paragraph 3	
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	The information of experimental **animals** is not involved in this paper.	n/a
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Footnote/paragraph 3	

Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	n/a
If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval	Not involved in this paper.	n/a

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.	Not involved in this paper.	n/a

Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of tests.	#Methods/paragraph 3, ###Precision	

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.	Not involved in this paper.	n/a
If data are publicly available, provide accession number in repository or DOI or URL.	Not involved in this paper.	n/a
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.	Not involved in this paper.	n/a

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		
State whether the code or software is available.	Not involved in this paper.	n/a
If code is publicly available, provide accession number in repository, or DOI or URL.	Not involved in this paper.	n/a

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication.
