

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/atm-22-3411	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The data miRNA Sequence in particular will be shared, and we also found a correlation between a certain dose-effect to irradiation injury which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Medical Radiologist and Hematologist who are interested in studies of microRNAs after total body irradiation.
8	For what type of analysis or purpose?	For analysis to plasma miRNAs of radiation injury during hematopoietic stem cell transplantation.
9	How or where can the data/documents be obtained?	The data that support the findings of this study are available from the corresponding author upon reasonable request.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
