

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/mhealth-22-35	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes, but sensitive identifying information (i.e., voiceprints, images of face, and name) from interviews will not be shared in compliance with HIPAA due to EHR recruitment. Results from the survey (excluding demographics) are available as an appendix.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	De-identified verbatim transcripts can and will be accessible, upon request to authors.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Protocol and informed consent forms regarding this aim of our study will be available for sharing.
5	When will data availability begin?	Currently available.
6	When will data availability end?	For up to seven years after completion of study.
7	To whom will you share the data?	Deidentified data will be shared upon request (via email preferred).
8	For what type of analysis or purpose?	Qualitative data can be requested for further thematic analysis or to validate methodology.
9	How or where can the data/documents be obtained?	Via secured email from authors.
10	Any other restrictions?	Due to participants being recruited from the electronic health record (EHR), identifiable data is confidential. Only de-identified data will be available for sharing.
