

## Data Sharing Statement

<b>Article Info</b>	http://dx.doi.org/10.21037/mhealth-20-143	
<b>Item</b>	<b>Question</b>	<b>Authors' Response</b> (place “-” if not applicable)
1	Would you like to share data collected for your study to others?	We are not able to share full datasets at this time.
2	If not, would you like to share the reason for your decision?	Informed consent procedures did not include this provision, and thus, participants did not give permission for data to be shared. These are preliminary datasets that include very little information beyond what is reported in the manuscript, as the studies were designed to inform improvements to future protocols. Should other researchers formally request our datasets, we may be able to apply to our IRBs for approval to release them.
3	What data in particular will be shared?	-
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	We would be happy to provide our interview guides for Studies 1 and 2 or our informed consent documents upon request.
5	When will data availability begin?	Upon publication of this manuscript.
6	When will data availability end?	-
7	To whom will you share the data?	Interested researchers who request access.
8	For what type of analysis or purpose?	For formative research processes to inform final EMA procedures.
9	How or where can the data/documents be obtained?	By submitting a request to the first author ( <a href="mailto:arigo@rowan.edu">arigo@rowan.edu</a> ).
10	Any other restrictions?	-
