

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/cdt-22-542	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The mean range of stent slippage when positioning and the rate of accurate placement of stents in particular will be shared.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Cardiologist and interventionalist
8	For what type of analysis or purpose?	To evaluate the efficacy and safety of a stent positioning system with dedicated nitinol device compared with the conventional approach for stenting of aorto-ostial coronary lesions.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: spnie@ccmu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
