

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/cdt-23-326	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Data from cell experiments in which the m6A demethylase FTO regulates the TLR4/NF- κ B axis affecting pyroptosis and inflammation in doxorubicin-induced heart failure.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	The datasets used or analyzed during the current study are available from the corresponding author on reasonable request.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years after publication.
7	To whom will you share the data?	Clinicians or researchers interested in the mechanisms by which m6A demethylase regulates heart failure.
8	For what type of analysis or purpose?	To analyze and evaluate the effects of m6A demethylase FTO on myocardial pyroptosis and inflammation in heart failure.
9	How or where can the data/documents be obtained?	An email can be sent to the following address to obtain the data: shaoliang5201@126.com.
10	Any other restrictions?	We may weigh the potential benefits and risks of each request and then provide data that can be shared.
