

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/cdt-23-356	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The thrombolytic data in particular will be shared, and we also found long-tone-burst ultrasound assisted microbubble enhanced rt-PA therapy showed successful lytic effects for platelet-rich thrombi in rats, which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plans and proposal reports will also be shared if required.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Cardiologists and sonographers who are interested in the studies of long-pulsed ultrasound.
8	For what type of analysis or purpose?	For analysis to evaluate the synergistic effects of long-pulsed ultrasound, microbubble and rt-PA for the treatment of arterial thrombosis.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: armydoctorchen@163.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
