

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/cdt-21-577	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The perioperative and follow-up data in particular will be shared, and we found that the outcome of posterior VSR is not worsen than that of anterior VSR, which is different from previous studies.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Cardiovascular surgeons interested in the study of ventricular septal rupture.
8	For what type of analysis or purpose?	For analysis to to investigate the clinical outcomes of surgical treatment for myocardial infarction combined with an anterior or posterior ventricular septal rupture.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: fuwei0530@126.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared .
