

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tau-23-53	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Technique for identifying the cavernous nerve. It was difficult to identify during preliminary surgeries. There are lots of resources online but we are happy to discuss with those interested.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	IRB, surgery protocol, traction protocol, statistical analyses.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	1 year.
7	To whom will you share the data?	Other researchers interested in traction therapy.
8	For what type of analysis or purpose?	To continue researching traction therapy as a potential therapeutic option for erectile function post prostatectomy.
9	How or where can the data/documents be obtained?	Please reach out to the authors and we will work to identify the requested data. Emails can be sent to brian.dick@ucsf.edu
10	Any other restrictions?	We will balance the risks and benefits for each request and provide the data that can be shared.
