

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tau-23-549	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	No
2	If not, would you like to share the reason for your decision?	All data has been supplied throughout the article and in the supplementary tables
3	What data in particular will be shared?	-
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Participate information sheet and consent form as well as the study protocol can be shared if requested.
5	When will data availability begin?	From publication date
6	When will data availability end?	Five years within the publication date to give opportunity for others to participate in the study with additional improvements
7	To whom will you share the data?	Reconstructive urologists and uro-pathologists with interest in urethral stricture disease and LS
8	For what type of analysis or purpose?	To further gather data in the aetiology and underlying incidence of LS in idiopathic stricture diseases. In addition, to determine the extent of histopathological change across the stricture and outcomes
9	How or where can the data/documents be obtained?	Emails expressing interest can be sent to: d.desai@toowoombaspecialists.com.au

10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
