<u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided:	n/a
For commercial reagents, provide supplier		Not used in
name, catalogue number and RRID, if available.		research

Cell materials	Yes (indicate where provided:	n/a
Cell lines: Provide species information, strain.		Not used in
Provide accession number in repository OR supplier name, catalog number, clone number,		research
OR RRID		
Primary cultures: Provide species, strain, sex of		Not used in
origin, genetic modification status.		research

Experimental animals	Yes (indicate where provided:	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID		Not used in research
Animal observed in or captured from the field: Provide species, sex and age where possible		Not used in research
Model organisms: Provide Accession number in repository (where relevant) OR RRID		Not used in research

Plants and microbes	Yes (indicate where provided:	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)		Not used in research
Microbes: provide species and strain, unique accession number if available, and source		Not used in research

Human research participants	Yes (indicate where provided:	n/a
Identify authority granting ethics approval (IRB or	Materials and methods/Page4/Para2/Line17-	
equivalent committee(s), provide reference number	19	
for approval.		
Provide statement confirming informed consent obtained from study participants.	Materials and methods/Page3/Para1/Line6	
Report on age and sex for all study participants.	Results/Page5/Para2/Line8-12	

Design

Study protocol	Yes (indicate where provided:	n/a
For clinical trials, provide the trial registration		Not a
number OR cite DOI in manuscript.		clinical trial

Laboratory protocol	Yes (indicate where provided:	n/a
Provide DOI or other citation details if detailed step-	Materials and methods/Page4/Para3/Line23-33	
by-step protocols are available.		

Experimental study design (statistics details)	Yes (indicate where provided:	n/a
State whether and how the following have been		
done, or if they were not carried out.		
Sample size determination	Materials and methods/Page3/Para1/Line3-5	
Randomisation	Materials and methods/Page3/Para1/Line5-6	
Blinding	Materials and methods/Page4/Para3/Line33	
Inclusion/exclusion criteria	Materials and methods/Page3/Para2,3/Line11-	
	23	

Sample definition and in-laboratory replication	Yes (indicate where provided:	n/a
State number of times the experiment was replicated in laboratory	Materials and methods/Page4/Para3/Line33-34	
Define whether data describe technical or biological replicates	Materials and methods/Page4/Para3/Line33-34	

Ethics	Yes (indicate where provided:	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Materials and methods/Page4/Para2/Line17- 19	
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		Not involve
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	Materials and methods/Page4/Para2/Line17- 19	

Dual Use Research of Concern (DURC)	Yes (indicate where provided:	n/a
If study is subject to dual use research of concern,		Not dual
state the authority granting approval and reference		use
number for the regulatory approval		

<u>Analysis</u>

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is	Results/Page5/Para3/Line14-19	
excluded, and whether the criteria for exclusion were		
determined and specified in advance.		

Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of	Materials and methods/Page4/Para4-6/Line38-44	
tests.	Materials and methods/Page5/Para1/Line1-4	

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available,	Availability of data and materials/	
including protocols for access or restriction on	Page7/Para6/Line40-41	
access.		
If data are publicly available, provide accession		Not
number in repository or DOI or URL.		involve
If publicly available data are reused, provide		Not
accession number in repository or DOI or URL, where		involve
possible.		

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential		
for replicating the main findings of the study:		
State whether the code or software is available.		Not
		involve
If code is publicly available, provide accession		Not
number in repository, or DOI or URL.		involve

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication.
