

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tau-20-1338	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The data concerning our conclusions: Nesbit modified corporoplasty without tourniquet application during reconstruction is a safe and effective surgical procedure for all kind of shortening corporoplasty to reduce the time of penile ischemia, preventing even serious consequences for the normal physiology of erection. The survival data in particular will be shared.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Medical Andrologists and Urological Surgeons are interested in these studies
8	For what type of analysis or purpose?	For analysis to evaluate the effectiveness of Reduction of penile hypoxic-ischemic anatomical and physiological damages through a modified Nesbit corporoplasty without Tourniquet Application.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: vincenzomaria.altieri@gmail.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
