

## Data Sharing Statement

<b>Article Info</b>	<a href="http://dx.doi.org/10.21037/tau-21-309">http://dx.doi.org/10.21037/tau-21-309</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Raw data of all renal pelvicalyceal classification types based on three-dimensional virtual reconstruction models
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Such as study protocol, statistical analysis plan will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	One year within the publication date, since the measurement based on 3D virtual reconstructive models may be updated over time.
7	To whom will you share the data?	Surgeons who are interested in studies of classification of renal pelvicalyceal system based on three-dimensional virtual reconstruction models.
8	For what type of analysis or purpose?	To validate the classification system and explore the impact of each morphological classification on endourological treatment efficacy
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: 348813114@qq.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
