

## Data Sharing Statement

<b>Article Info</b>	<a href="https://dx.doi.org/10.21037/tau-22-32">https://dx.doi.org/10.21037/tau-22-32</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Experimental data on the number of microvessels can be shared. We found the effect of DAPHNE wolfsill on the density of microvessels in bladder tumor model rats, which was less studied in other experiments.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, statistical analysis plan, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time
7	To whom will you share the data?	Medical oncologist interested in modeling bladder tumors
8	For what type of analysis or purpose?	For analysis to evaluate the safety of Stellaria chamaejasme in patients with bladder cancer.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: chenguojun68@126.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
