## TRIPOD Checklist: Prediction Model Development and Validation

| Section                   | Item |     | Checklist description  | Reported on Page<br>Number/Line<br>Number | Reported on<br>Section/Paragraph  |
|---------------------------|------|-----|--|---|---|
| Title and abstract        |      |     |  |   |   |
| Title                     | 1    | D;V | Identify the study as developing and/or validating a multivariable prediction model, the target population, and the outcome to be predicted.   |   | "Title"   |
| Abstract                  | 2    | D;V | Provide a summary of objectives, study design, setting, participants, sample size, predictors, outcome, statistical analysis, results, and conclusions.  |   | "Abstract"  |
| Introduction              |      |     |  |   |   |
| Background and objectives | 3a   | D;V | Explain the medical context (including whether diagnostic or prognostic) and rationale for developing or validating the multivariable prediction model, including references to existing models. | Page 1 / Line17-21<br>Page2/Line5-8       | "Introduction"<br>Paragraph 1-3   |
|                           | Зb   | D;V | Specify the objectives, including whether the study describes the development or validation of the model or both.  | Page 3/Line1-2                            | "Introduction"/<br>Paragraph 4  |
| Methods                   |      |     |  |   |   |
| Source of data            | 4a   | D;V | Describe the study design or source of data (e.g., randomized trial, cohort, or registry data), separately for the development and validation data sets, ifapplicable.                           | Page 3/Line8-19                           | "Study Population"  |
|                           | 4b   | D;V | Specify the key study dates, including start of accrual; end of accrual; and, if applicable, end of follow-up.   | Page 3/Line12                             | "Study Population"  |
| Participants              | 5a   | D;V | Specify key elements of the study setting (e.g., primary care, secondary care, general population) including number and location of centres.   | Page 3/Line10-19                          | "StudyPopulation"   |
|                           | 5b   | D;V | Describe eligibility criteria for participants.  | Page 3/Line10-17                          | "Study Population"  |
|                           | 5c   | D;V | Give details of treatments received, if relevant.  |   |   |
| Outcome                   | 6a   | D;V | Clearly define the outcome that is predicted by the prediction model, including how and when assessed.   | Page 4/Line8-12                           | Microsatellite Instability<br>status Assessment   |
|                           | 6b   | D;V | Report any actions to blind assessment of the outcome to be predicted.   | Page 5/Line5-9                            | Tumor Segmentation and Radiomics Feature Extraction   |
| Predictors                | 7a   | D;V | Clearly define all predictors used in developing or validating the multivariable prediction model, including how and when they were measured.  | Page6-7<br>/Line13-22/1-5                 | "Feature Selection and Radiomics<br>Signature Construction" Developm<br>and Evaluation of Prediction Mode |
|                           | 7b   | D;V | Report any actions to blind assessment of predictors for the outcome and other predictors.   | Page 5/Line4-9                            | "Tumor Segmentation and Radiom  |
| Sample size               | 8    | D;V | Explain how the study size was arrived at.   | Page 3/Line10-17                          | "Study Population"  |

| Missing data                    | 9   | D;V | Describe how missing data were handled (e.g., complete-case analysis, single imputation, multiple imputation) with details of any imputation method.  |                   |   |                                |
|---------------------------------|-----|-----|---|-------------------|---|--------------------------------|
| Statistical analysis<br>methods | 10a | D   | Describe how predictors were handled in the analyses.   | Page 6/Line 8-22  | "Feature Selection and Ra<br>Signature Construction"                    | idiomics                       |
|                                 | 10b | D   | Specify type of model, all model-building procedures (including any predictor selection), and method for internal validation.   | Page 7/Line7-9    | "Development and Eva<br>Prediction Model"                               | aluation o                     |
|                                 | 10c | V   | For validation, describe how the predictions were calculated.   | N/A               | N/A   |                                |
|                                 | 10d | D;V | Specify all measures used to assess model performance and, if relevant, to compare multiple models.   | Page 7/Line11-21  | "Development and Eva<br>Prediction Model"                               | aluation of                    |
|                                 | 10e | V   | Describe any model updating (e.g., recalibration) arising from the validation, if done.   |                   |   |                                |
| Risk groups                     | 11  | D;V | Provide details on how risk groups were created, if done.   |                   |   |                                |
| Development vs.<br>validation   | 12  | V   | For validation, identify any differences from the development data in setting, eligibility criteria, outcome, and predictors.   | N/A               | N/A   |                                |
| Results                         |     |     |   | -                 |   |                                |
| Participants                    | 13a | D;V | Describe the flow of participants through the study, including the number of participants with and without the outcome and, if applicable, a summary of the follow-up time. A diagram may be helpful. | Page 8/Line10-14  | "Patient Profiles"  |                                |
|                                 | 13b | D;V | Describe the characteristics of the participants (basic demographics, clinical features, available predictors), including the number of participants with missing data for predictors and outcome.    |                   | "Table 1"   |                                |
|                                 | 13c | V   | For validation, show a comparison with the development data of the distribution of important variables (demographics, predictors and outcome).  |                   | "Table 1"   |                                |
| Model                           | 14a | D   | Specify the number of participants and outcome events in each analysis.   | Page 8/Line10     | "Patient Profiles"  |                                |
| development                     | 14b | D   | If done, report the unadjusted association between each candidate predictor and outcome.  |                   |   |                                |
| Model<br>specification          | 15a | D   | Present the full prediction model to allow predictions for individuals (i.e., all regression coefficients, and model intercept or baseline survival at a given time point).                           | Page 8/Line16-21  | "Feature Selection and<br>Building" "Developme<br>Evaluation of the Non | Radscore<br>ent and<br>mogram" |
|                                 | 15b | D   | Explain how to the use the prediction model.  |                   |   | logram                         |
| Model<br>performance            | 16  | D;V | Report performance measures (with CIs) for the prediction model.  | Page 9-10/Line4-2 | "Development and<br>22Evaluation of the<br>Nomogram"                    |                                |
| Model-updating                  | 17  | V   | If done, report the results from any model updating (i.e., model specification, model performance).   |                   |   |                                |
| Discussion                      |     |     |   | -                 |   |                                |
| Limitations                     | 18  | D;V | Discuss any limitations of the study (such as nonrepresentative sample, few events per predictor, missing data).  | Page 13/Line8-20  | "Discussion"/<br>Paragraph 5  |                                |

| Interpretation            | 19a | V   | For validation, discuss the results with reference to performance in the development data, and any other validation data.                          | Page 11-13/Line1-2 | 22"Discussion"/<br>Paragraph 4               |  |
|---------------------------|-----|-----|--|--------------------|--|--|
|                           | 19b | D;V | Give an overall interpretation of the results, considering objectives, limitations, and results from similar studies, and other relevant evidence. | Page 12-13/Line1-  | 22''Discussion'' <sup>/</sup><br>Paragraph 4 |  |
| Implications              | 20  | D;V | Discuss the potential clinical use of the model and implications for future research.  | ge 13-14/Line1.222 | "Discussion"/Paragraph 6                     |  |
| Other information         |     |     |  |                    |  |  |
| Supplementary information | 21  | D;V | Provide information about the availability of supplementary resources, such as study protocol, Web calculator, and data sets.                      |                    | "SupplementaryAppendix                       |  |
| Funding                   | 22  | D;V | Give the source of funding and the role of the funders for the present study.  | Page 14/Line16-19  | "Acknowledgements"                           |  |

\* Items relevant only to the development of a prediction model are denoted by D, items relating solely to a validation of a prediction model are denoted by V, and items relating to both are denoted D;V. We recommend using the TRIPOD Checklist in conjunction with the TRIPOD Explanation and Elaboration document.
