Retraction to: *Quant Imaging Med Surg* 2021;11:1490-5.

After the article titled “Clinical characteristics and endovascular treatment in patients with intracranial giant serpentine aneurysms” (1) being published in Vol 11, No 4 (April 01, 2021) issue of *Quantitative Imaging in Medicine and Surgery*, it was noted that this article contains significant overlaps (mainly figures, including *Figure 1*, *Figure 2A,2B*, and *Figure 3A,3C*) with the article titled “Endovascular treatment of intracranial giant serpentine aneurysms” published in *The Neuroradiology Journal* in 2009 (doi: [10.1177/197140090702000220](https://doi.org/10.1177/197140090702000220)).

In light of the above concerns, the *QIMS* editors retract this publication. We regret that these issues were not identified prior to the articles’ publication.
