

Materials Design Analysis Reporting (MDAR) Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: [doi:10.31222/osf.io/9sm4x](https://doi.org/10.31222/osf.io/9sm4x)). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier name, catalogue number and RRID, if available.		<input type="radio"/>
Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID		<input type="radio"/>
Primary cultures: Provide species, strain, sex of origin, genetic modification status.		<input type="radio"/>
Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID		<input type="radio"/>
Animal observed in or captured from the field: Provide species, sex and age where possible		<input type="radio"/>
Model organisms: Provide Accession number in repository (where relevant) OR RRID		<input type="radio"/>
Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)		<input type="radio"/>
Microbes: provide species and strain, unique accession number if available, and source		<input type="radio"/>
Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Materials and Methods – <i>subjects</i> 1 st paragraph	
Provide statement confirming informed consent obtained from study participants.	Materials and Methods – <i>subjects</i> 1 st paragraph	
Report on age and sex for all study participants.		<input type="radio"/>

Design

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration number OR cite DOI in manuscript.		<input type="radio"/>
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-by-step protocols are available.		<input type="radio"/>
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been done, or if they were not carried out.		
Sample size determination		<input type="radio"/>
Randomisation		<input type="radio"/>
Blinding	Materials and Methods – <i>subjects</i> 1 st paragraph	
Inclusion/exclusion criteria	Materials and Methods – <i>subjects</i> 2 nd paragraph	
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was replicated in laboratory		<input type="radio"/>
Define whether data describe technical or biological replicates		<input type="radio"/>
Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Materials and Methods – <i>subjects</i> 1 st paragraph	
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		<input type="radio"/>
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.		<input type="radio"/>
Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	n/a
If study is subject to dual use research of concern, state the authority granting approval and reference number for the regulatory approval		<input type="radio"/>

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.	Figure 1	
Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of tests.	<i>Materials and Methods – Evaluation of the proposed systems and statistical analysis 1st and 3rd paragraphs</i>	<input type="radio"/>
Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.	<i>Footnote – Data Availability</i>	
If data are publicly available, provide accession number in repository or DOI or URL.		<input type="radio"/>
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.		<input type="radio"/>
Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		<input type="radio"/>
State whether the code or software is available.		<input type="radio"/>
If code is publicly available, provide accession number in repository, or DOI or URL.		<input type="radio"/>

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	<i>ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication.</i>
