Reviewer A

Timely and interesting paper, well written, I am sure will be very well received. Please note that this paper requires some editing - nothing major, but some rephrasing may be beneficial.

1. LINE 63: "The methodological approach used in past vaccination programs seems differ from the indiscriminate use of COVID-19 vaccination in children and youth who may exhibit a substantial risk of myocarditis (5)." THIS SENTENCE IS NOT ENTIRELY CLEAR, CLARIFICATION MAY BE BENEFICIAL.
2. LINE 67: " Translational Pediatrics has a natural and spiritual father in Professor Fanconi, probably the father of Modern Pediatrics (3). " GREAT STATEMENT, BUT PLEASE REPHRASE.
3. LINE 74: "but spiritually still searching oriented like at his times" PLEASE REPHRASE.
4. LINE 81: The prospect of endurance of premies (premaature babies) SPELLING.
5. LINE 85: "cardiovascular function may derail and they are intimately related to jeopardize the life of these creatures." NOT SURE THE WORD "CREATURES" IS APPROPRIATE IN REFERENCE TO BABIES... PLEASE CHANGE.
6. Lines 94-95, repeat word.

Thank you very much for your comments and suggestions. I have adopted all your suggestions and modified the manuscript accordingly.
