

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tp-22-505	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The individual plasma concentration and the corresponding urinary excretion data in particular will be shared, since both data provided the basic evidence for modelling on the relation between plasma and urine, and have not been reported as every single individual.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Analysis method, modelling protocol, informed consent form and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Within two years, as this modelling method might be updated by more sophisticated technique over time.
7	To whom will you share the data?	Pediatric doctors and new drug developers who are in trouble by dosing decision.
8	For what type of analysis or purpose?	For pediatric pharmacokinetic research.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: wdzth@sina.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
