

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tp-20-230.	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	In particular, the data reflecting the cytokine levels of patients will be shared.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan and informed consent form will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date. In particular, we can provide data support for meta-analysis at any time.
7	To whom will you share the data?	We would like to share our data with any medical personnel in critical care medicine.
8	For what type of analysis or purpose?	For analysis to evaluate the relation between severe neutropenia and clinical outcomes or biomarker features of sepsis patients.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: ningbotao@126.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
