

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tp-20-317.	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The DDA and DIA raw files generated from mass spectrometry.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	At least one year within the publication date. It depends on how long the database Web site maintains the data.
7	To whom will you share the data?	Scientists who are interested in studies of urine proteomics.
8	For what type of analysis or purpose?	For analysis for the diagnosis and phenotyping of abdominal type HSP.
9	How or where can the data/documents be obtained?	We have uploaded all the raw data in this study to iProx database. The data link is as follows: https://www.iprox.org/page/PSV023.html?url=1607613082959fQRg(RqXc)
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
