

Data Sharing Statement		
Article Info	<a href="http://dx.doi.org/10.21037/tp-21-162">http://dx.doi.org/10.21037/tp-21-162</a>	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Patients' demographic data will be shared, and we also found that left-behind children were significantly more likely to be injured by instruments which should be routinely kept away from children. This has never been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	One year within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Ophthalmologists who are interested in studies of left-behind children and ocular trauma.
8	For what type of analysis or purpose?	For analysis to evaluate the therapeutic effect of pars plana vitrectomy in children's open globe injury.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: drsunchongcui@126.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
