

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tp-20-415	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The survival data in particular will be shared, and we also found that when modified NF-08-TM conditioning regimen was applied in β -thalassemia major patients, certain mismatched-donor graft could acquire similar survival outcomes and incidences of complications (except for aGVHD) as fully-matched donor transplantation.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Medical hematologist and pediatricist who are interested in studies of pediatric hematopoietic stem cell transplantation
8	For what type of analysis or purpose?	For analysis to evaluate the effectiveness of modified NF-08-TM regime in thalassemia major children with fully matched or mismatched donor.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: jiang_hua18@sina.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
