Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page 3/Line 81	Abstract
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page 3/Line 74-94	Abstract
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page 4-5/Line 104-138	Introduction
Objectives	3	State specific objectives, including any prespecified hypotheses	Page 5/Line 139-146	Introduction
Methods			·	·
Study design	4	Present key elements of study design early in the paper	Page 6/Line 162-174	Methods
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page 6/Line 162-174	Methods
Participants	6	<ul> <li>(a) <i>Cohort study</i>—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up</li> <li><i>Case-control study</i>—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls</li> <li><i>Cross-sectional study</i>—Give the eligibility criteria, and the sources and methods of selection of participants</li> </ul>	Page 6/Line 162-174	Methods
		(b) <b>Cohort study</b> —For matched studies, give matching criteria and number of exposed and unexposed <b>Case-control study</b> —For matched studies, give matching criteria and the number of controls per case	N/A	N/A
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page 6-8/Line 176-230	Methods
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page 6-8/Line 176-230	Methods
Bias	9	Describe any efforts to address potential sources of bias	Page 8-9/Line 232-243	Methods
Study size	10	Explain how the study size was arrived at	Page 6/Line 167	Methods
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page 8-9/Line 232-243	Methods

## STROBE Statement-checklist of items that should be included in reports of observational studies

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Page 8-9/Line 232-243	Methods
		(b) Describe any methods used to examine subgroups and interactions	Page 8-9/Line 232-243	Methods
		(c) Explain how missing data were addressed	Page 8-9/Line 232-243	Methods
		(d) <i>Cohort study</i> —If applicable, explain how loss to follow-up was addressed <i>Case-control study</i> —If applicable, explain how matching of cases and controls was addressed <i>Cross-sectional study</i> —If applicable, describe analytical methods taking account of sampling strategy	N/A	N/A
		(e) Describe any sensitivity analyses	Page 8-9/Line 232-243	Methods
Results		•		
Participants	13*	(a) Report numbers of individuals at each stage of study-eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page 10/Line 286-291	Results
		(b) Give reasons for non-participation at each stage	Figure 1	Results
		(c) Consider use of a flow diagram	Figure 1	Results
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Table 1 and page 10/ Line 289-298	Results
		(b) Indicate number of participants with missing data for each variable of interest	Page 24/Line 756	Table 1
		(c) <b>Cohort study</b> —Summarise follow-up time (eg, average and total amount)	Page 10/Line 294-296	Results
Outcome data	15*	Cohort study-Report numbers of outcome events or summary measures over time	Page10/Line 301	Results
		Case-control study – Report numbers in each exposure category, or summary measures of exposure	N/A	N/A
		Cross-sectional study – Report numbers of outcome events or summary measures	N/A	N/A
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page10/Line 301	Results
		(b) Report category boundaries when continuous variables were categorized	Page10/Line 301	Results
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A	N/A
Other analyses	17	Report other analyses done-eg analyses of subgroups and interactions, and sensitivity analyses	Page 11/Line 336-346	
Discussion				
Key results	18	Summarise key results with reference to study objectives	Page 13/Line 363-370	Discussion
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page 15/Row 456	Discussion
	1	1	I	1

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page 17/Row 480	Discussion			
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page 17/Row 480	Discussion			
Other information							
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	1	Cover page			

\*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
