1	Would you like to share data collected for your study to others?	No.
2	If not, would you like to share the reason for your decision?	Legally, our study involved human research, which includes potentially identifying information about sensitive issues such as cognitive function. ALS is relatively rare condition and the study includes one hospital. Therefore, we cannot guarantee anonymity to the participants. Ethically, all participants were informed that only anonymous data would be published. The Ethical Committee approved the study (ref 2016/3166) based on the statement that only anonymous data will be used. Any data request may be done by contacting Helse Bergen HF, Orthopaedic clinic, professor Kjell Matre.
