

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/apm-20-1753	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The correlation between histogram analysis parameters and LF stage in particular will be shared, and we also confirmed that 75 th percentiles was the most valuable parameter in diagnosing hepatic fibrosis.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan, informed consent form.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Three years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Liver disease physicians and radiologists who are interested in hepatic fibrosis staging.
8	For what type of analysis or purpose?	For analysis to evaluate the value of histogram analysis parameters of BOLD-fMRI in diagnosing hepatic fibrosis.
9	How or where can the data/ documents be obtained?	Emails could be sent to the address below to obtain the shared data: suzhxingwei@suda.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
