Risk of bias in studies	18	Present assessments of risk of bias for each included study.	Page19/Line433	Results/Table2
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Page19/Line430	Results/Table1

Results of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	Page9/Line189-197	Results/Paragraph2
