Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page3/Line3-14	Abstract/Para1-2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page3/Line3-21	Abstract/Para1-3
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page6/Line4-51	Introduction/Para1-2
Objectives	3	State specific objectives, including any prespecified hypotheses	Page7-8/Line4-53	Introduction/Para3-4
Methods			·	
Study design	4	Present key elements of study design early in the paper	Page10/Line2-4	Methods/Para-1-2
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page10-11/Line2-37	Methods/Para1-5
Participants	6	 (a) <i>Cohort study</i>—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up <i>Case-control study</i>—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls <i>Cross-sectional study</i>—Give the eligibility criteria, and the sources and methods of selection of participants 	Page10-12/Line8-52	Methods/Para2-5
		(b) Cohort study —For matched studies, give matching criteria and number of exposed and unexposed Case-control study —For matched studies, give matching criteria and the number of controls per case	Page10/Line8-23	Methods/Para2
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page10-11/Line15-37	Methods/Para2-3
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page11-12/Line24-52	Methods/Para3-5
Bias	9	Describe any efforts to address potential sources of bias	Page11-13/Line24-66	Methods/Para3-6
Study size	10	Explain how the study size was arrived at	Page10/Line8-23	Methods/Para2
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page10-11/Line10-37	Methods/Para2-3

STROBE Statement-checklist of items that should be included in reports of observational studies

12	(a) Describe all statistical methods, including those used to control for confounding	Page12/Line53-69	Methods/Para6
	(b) Describe any methods used to examine subgroups and interactions	Page12/Line53-69	Methods/Para6
	(c) Explain how missing data were addressed	Page12/Line53-69	Methods/Para6
	(d) Cohort study —If applicable, explain how loss to follow-up was addressed Case-control study —If applicable, explain how matching of cases and controls was addressed Cross-sectional study —If applicable, describe analytical methods taking account of sampling strategy	Page12/Line53-69	Methods/Para6
	(e) Describe any sensitivity analyses	Page12/Line53-69	Methods/Para6
13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page15/Line1-9	Results/Para1
	(b) Give reasons for non-participation at each stage	Page15/Line1-9	Results/Para1
	(c) Consider use of a flow diagram	Page15/Line3-9	Results/Para1
14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Page15/Line9-10	Results/Para1
	(b) Indicate number of participants with missing data for each variable of interest	Page15/Line1-10	Results/Para1
	(c) Cohort study —Summarise follow-up time (eg, average and total amount)	Page15/Line2-3	Results/Para1
15*	Cohort study – Report numbers of outcome events or summary measures over time	Page15/Line9-32	Results/Para1-3
	Case-control study – Report numbers in each exposure category, or summary measures of exposure	Page15/Line9-32	Results/Para1-3
	Cross-sectional study – Report numbers of outcome events or summary measures	Page15-16/Line9-32	Results/Para1-3
16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page15-16/Line9-32	Results/Para1-3
	(b) Report category boundaries when continuous variables were categorized	Page15-16/Line1-32	Results/Para1-3
	(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	Page15-16/Line1-32	Results/Para1-3
17	Report other analyses done-eg analyses of subgroups and interactions, and sensitivity analyses	Page15-16/Line1-32	Results/Para1-3
·	·	·	·
18	Summarise key results with reference to study objectives	Page18/Line1-14	Discussion/Para1
19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction	Page19-20/Line27-65	Discussion/Para2-6
	13* 14* 15* 16 17 18	13* Cohort study – If applicable, explain how loss to follow-up was addressed 13* (a) Report numbers of individuals at each stage of study – eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed 13* (a) Report numbers of individuals at each stage of study – eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed (b) Give reasons for non-participation at each stage (c) Consider use of a flow diagram 14* (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders (b) Indicate number of participants with missing data for each variable of interest (c) Cohort study – Report numbers of outcome events or summary measures over time 15* Cohort study – Report numbers of outcome events or summary measures of exposure Cross-sectional study – Report numbers of outcome events or summary measures (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included (b) Report category boundaries when continuous variables were categorized (c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period 17 Report other analyses done – eg analyses of subgroups and interactions, and sensitivity analyses <td>(c) Describe any methods used to examine subgroups and interactions Page12/Line53.69 (c) Explain how missing data were addressed Page12/Line53.69 (c) Cohort study—If applicable, explain how loss to follow-up was addressed Page12/Line53.69 (c) Cohort study—If applicable, explain how matching of cases and controls was addressed Page12/Line53.69 (c) Describe any sensitivity analyses Page12/Line53.69 13* (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility. (b) Give reasons for non-participation at each stage Page15/Line1.9 (c) Consider use of a flow diagram Page15/Line1.9 Page15/Line1.9 (d) Give reasons for non-participation at each stage Page15/Line1.9 Page15/Line1.9 (b) Give reasons for non-participation at each stage Page15/Line1.9 Page15/Line1.9 (c) Consider use of a flow diagram Page15/Line1.9 Page15/Line3.9 (b) Indicate number of participants with missing data for each variable of interest Page15/Line3.3 Page15/Line3.3 15* Cohort study—Report numbers of outcome events or summary measures over time Page15/Line9.32 Case-control study—Report numbers of outcome events or summary measures Page15/Line9.32 16 (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and thei</td>	(c) Describe any methods used to examine subgroups and interactions Page12/Line53.69 (c) Explain how missing data were addressed Page12/Line53.69 (c) Cohort study—If applicable, explain how loss to follow-up was addressed Page12/Line53.69 (c) Cohort study—If applicable, explain how matching of cases and controls was addressed Page12/Line53.69 (c) Describe any sensitivity analyses Page12/Line53.69 13* (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility. (b) Give reasons for non-participation at each stage Page15/Line1.9 (c) Consider use of a flow diagram Page15/Line1.9 Page15/Line1.9 (d) Give reasons for non-participation at each stage Page15/Line1.9 Page15/Line1.9 (b) Give reasons for non-participation at each stage Page15/Line1.9 Page15/Line1.9 (c) Consider use of a flow diagram Page15/Line1.9 Page15/Line3.9 (b) Indicate number of participants with missing data for each variable of interest Page15/Line3.3 Page15/Line3.3 15* Cohort study—Report numbers of outcome events or summary measures over time Page15/Line9.32 Case-control study—Report numbers of outcome events or summary measures Page15/Line9.32 16 (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and thei

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page19/Line27-65	Discussion/Para3-6				
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page19/Line27-65	Discussion/Para3-6				
Other information								
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page23/Line1	Funding Support				

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
