

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/apm-21-751	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The relevant test data will be shared, and we also found the combination of PMB with Propofol medium and long chain fat emulsion injection is novel and brand-new, which has seldom been studied.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or drug development may be updated over time.
7	To whom will you share the data?	Clinician in emergency department, infection department and ICU who are interested in studies of sepsis.
8	For what type of analysis or purpose?	For analysis to evaluate the bacteriostatic effects of Polymyxin B combined with Propofol medium and long chain fat emulsion injection against other Gram-negative bacilli.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: wangyue_carat@163.com or jhy@ntu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
