

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/apm-21-556	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	No. The datasets used to support this study are not freely available in view of participants' privacy protection.
2	If not, would you like to share the reason for your decision?	The datasets used to support this study are not freely available in view of participants' privacy protection.
3	What data in particular will be shared?	-
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Yes. The protocol and statistical analysis plan can be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication data, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Researchers and clinical doctors.
8	For what type of analysis or purpose?	For clinical research about the efficacy of pulsatile GnRH therapy.
9	How or where can the data/documents be obtained?	E-mails could be sent to Weijun Gu or Yiming Mu to obtain the data that mentioned above.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
