

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/apm-21-482	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The hemodynamic data, especially effective arterial elastance in predicting norepinephrine, and fluid responsiveness, which has seldom been provided in previous studies
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date.
7	To whom will you share the data?	Physicians and clinicians who are interested in hemodynamic monitoring, especially in the arterial load and effective arterial elastance
8	For what type of analysis or purpose?	For analysis and validate the value of effective arterial elastance in circulatory resuscitation.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: yangtingkm@qq.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
