Article Info	https://dx.doi.org/10.21037/apm-21-2583	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The treatment data will be shared, and we also found that the intervention time and the fistula size are the independent risk factors for prolonging the treatment time of the modified "three-tube method", which has seldom been provided in previous studies
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Cardiothoracic surgeons interested in the diagnosis and treatment of esophageal cancer.
8	For what type of analysis or purpose?	For analysis to evaluate the safety of the modified "three-tube method" in IAL patients.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: zengqinghuis@gmail.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
