

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/apm-21-2687	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	No.
2	If not, would you like to share the reason for your decision?	The raw data included the digital recorders and written recorders since the study used a qualitative method. For patients who could communicate via tracheoesophageal speech or voice prostheses, the data were collected by a digital voice recorder; for patients who could not speak, the narrative data were written by patients themselves. Some personal information of the participants involved in the raw data which could not be shared according to the ethical principles.
3	What data in particular will be shared?	-
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol and informed consent form can be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date.
7	To whom will you share the data?	E.N.T. department nurses who are interested in studies of total laryngectomy patients.
8	For what type of analysis or purpose?	Other studies about total laryngectomy patients.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared documents: ebigking@163.com.

10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the documents that could be shared.
