

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/apm-21-3251	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The prevalence of hyper-glucose in the Shanghai Songjiang district in particular can be shared, and we also found 56–60-year-old female subjects who were overweight and with central obesity were apt to abnormal glucose regulation, which has been seldom provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan and informed consent form can be shared if to be requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the prevalence of diabetes in the Shanghai Songjiang district may be updated over time.
7	To whom will you share the data?	Researchers and endocrinologist who are interested in the epidemiology study of diabetes mellitus.
8	For what type of analysis or purpose?	For analysis to evaluate the prevalence of diabetes and the risk factors for diabetes.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: Shmily1691@163.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
