RESULTS				
Study selection	16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	Figure 1	Figure 1
	16b	Cite studies that met many but not all inclusion criteria ('near-misses') and explain why they were excluded.	None	
Study characteristics	17	Cite each included study and present its characteristics.	Table 1	Table 1
Risk of bias in studies	18	Present assessments of risk of bias for each included study.	Table 2	Table 2
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Figure 2–9	Figure 2–9

Results of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	Page 10/Line 8–9	Results/Paragraph 2.3.4
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	Page 10/Line 9–11	Results/Paragraph 2.3.4
	20c	Present results of all investigations of possible causes of heterogeneity among study results.	Page 12/Line 4–8	Results/Paragraph 2.3.7
	20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized results.	Page 12/Line 8–10	Results/Paragraph 2.3.7
Reporting biases	21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each synthesis assessed.	Figure 11	
Certainty of evidence	22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.	N/A	N/A
