

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/apm-21-3775	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Mainly survival analysis data and ROC curve analysis data will be shared, and we also found that the relationship of high platelet reactivity, CYP2C19 polymorphisms, and recurrent ischemic events is less frequently involved.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Physicians and academics interested in the research of diagnosis and treatment of cerebrovascular disease.
8	For what type of analysis or purpose?	For analyzing the diagnostic and treatment safety of assessing cerebrovascular disease
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: zhaojialin83@163.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
