RESULTS				
Study selection	16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	Page 3/Line 1-8	Results/Paragraph 2

Study characteristics	17	Cite each included study and present its characteristics.	Page 6/Line 13-18	Results/Paragraph 3
Risk of bias in studies	18	Present assessments of risk of bias for each included study.	Page 4/Line 13	Results/Paragraph 3
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Page 6/Line 14	Results/Paragraph 3

Results of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	NA	NA
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	Page 6/Line 1-7	Results/Paragraph 1
