

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/abs-21-110	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The extent of breast MRI signal void artefacts which is most relevant to this study.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	This is still an ongoing study for the comparison between conventional method and superparamagnetic iron oxide. Therefore the study protocol, informed consent form will not be shared.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date.
7	To whom will you share the data?	Breast radiologists and surgeons where are interested in the use of superparamagnetic iron oxide guided sentinel lymph node biopsy.
8	For what type of analysis or purpose?	For analysis to evaluate the extent of breast MRI void artefacts after superparamagnetic iron oxide guided sentinel lymph node biopsy and for study to minimize this adverse effect.
9	How or where can the data/documents be obtained?	Email should be directed to Professor Ava Kwong (avakwong@hku.hk) to obtain the shared data.
10	Any other restrictions?	We may balance the potential benefits and risks for each request as well as the confidentiality of involved subjects. We will provide the data that could be shared.
