

STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study’s design with a commonly used term in the title or the abstract	1/2	Title
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	2/37-57	Abstract
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	3/61-77	Intro
Objectives	3	State specific objectives, including any prespecified hypotheses	3/64-66	Intro/1st paragraph
Methods				
Study design	4	Present key elements of study design early in the paper	4/80	Method/1st paragraph
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	4/81 - 83	Method/1st paragraph
Participants	6	(a) Cohort study —Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study —Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study —Give the eligibility criteria, and the sources and methods of selection of participants	4/83-86	Method/1st paragraph
		(b) Cohort study —For matched studies, give matching criteria and number of exposed and unexposed Case-control study —For matched studies, give matching criteria and the number of controls per case	N/A - not matched	N/A- not matched
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	4/85-86,90	Method/1st paragraph
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	4/80-83	Method/1st paragraph
Bias	9	Describe any efforts to address potential sources of bias	4/83-85	Method/1st paragraph
Study size	10	Explain how the study size was arrived at	5/99-102	Method/2nd paragraph
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	5/94-95	Method/2nd paragraph

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	5/98-100	Method/2nd paragraph
		(b) Describe any methods used to examine subgroups and interactions	5/98-100	Method/2nd paragraph
		(c) Explain how missing data were addressed	4/88-89	Method/1st paragraph
		(d) Cohort study —If applicable, explain how loss to follow-up was addressed Case-control study —If applicable, explain how matching of cases and controls was addressed Cross-sectional study —If applicable, describe analytical methods taking account of sampling strategy	4/88-89	Method/1st paragraph
		(e) Describe any sensitivity analyses	N/A- not done	N/A - not done
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	5/108	Results/1st paragraph
		(b) Give reasons for non-participation at each stage	N/A- already excluded	N/A - already excluded
		(c) Consider use of a flow diagram	N/A - already excluded	N/A - already excluded
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	5/109-121	Results/1st paragraph
		(b) Indicate number of participants with missing data for each variable of interest	N/A - if missing, excluded	N/A- if missing, excluded
		(c) Cohort study —Summarise follow-up time (eg, average and total amount)	N/A - no follow-up time	N/A - no follow-up time6/
Outcome data	15*	Cohort study —Report numbers of outcome events or summary measures over time	6/123-153	Results/2&3rd paragraph
		Case-control study —Report numbers in each exposure category, or summary measures of exposure	N/A - refer to above	N/A -refer to above
		Cross-sectional study —Report numbers of outcome events or summary measures	N/A- refer to above	N/A - refer to above
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	7/156-170	Results/4th paragraph
		(b) Report category boundaries when continuous variables were categorized	N/A - no continous variable	N/A - no continuous variabl
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A - only OR	N/A - only OR
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	N/A - no further analyses	N/A - no further analyses
Discussion				
Key results	18	Summarise key results with reference to study objectives	9/194-195,204-20,212-215	Disc/1&2nd paragraph
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	10/223-236	Disc/3rd paragraph

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	11/234-236	Disc/3rd paragraph
Generalisability	21	Discuss the generalisability (external validity) of the study results	11/236-238	Disc/3rd paragraph
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	2/34-35	2nd page

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at <http://www.plosmedicine.org/>, Annals of Internal Medicine at <http://www.annals.org/>, and Epidemiology at <http://www.epidem.com/>). Information on the STROBE Initiative is available at www.strobe-statement.org.
