### **Reviewer A**

Interesting narrative review that addressed the problem of pneumothorax and pneumomediastinum in ARDS including COVID-19 associated ARDS that showed an increase in the incidence in pneumomediastinum complicating the ventilatory management of these patients.

**Response: We thank the reviewer for the insightful comments and encouragement.**

### **Reviewer B**

I would like to extend my congratulations to the authors for their outstanding work. The article is well-written and reflects the efforts invested by the authors.

**Response: We thank the reviewer for the insightful comments and encouragement.**
